Panel Discussion***

“Human Behaviour and Environmental Sustainability: Analytical and Theoretical issues”

Panellists	Dr. Farooq Ahmed Jam (Phd) Prof, Ir. Dr. Mohd Jailani Bin Mohd Nor
Participants	All Participants

The Panel members will be involved in discussion related to: Social and behavioral research is crucial for securing environmental sustainability and improving human living environments. To put the discussion into broader perspective, an overview of worldwide developments in environmental quality and trends in resource use will be discussed in this panel discussion. Generally, Five general driving forces of global environmental change are distinguished: population, affluence, technology, institutions, and culture; these are considered in view of critical transitions in the evolution of human society. The experts will also give a general description on this issue's specific topics for research and policy support concerning environmental sustainability at different scale levels. The necessity of multidisciplinary collaboration and desirable developments in environmental psychology will also be discussed.
